

EXP_02. Set up an Azure DevOps project

AIM:

To set up an Azure DevOps project for efficient collaboration and agile work management.

STEPS:

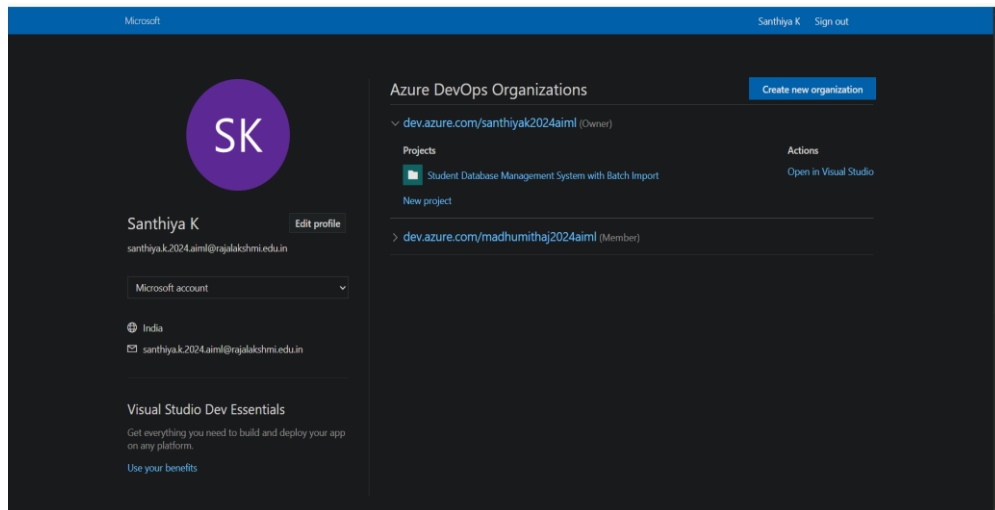

1. Create an Azure account
2. Create the First Project in Your Organization
 - a. After the organization is set up, you'll need to create your first **project**. This is where you'll begin to manage code, pipelines, work items, and more.
 - b. On the organization's **Home page**, click on the **New Project** button.
 - c. Enter the project name, description, and visibility options:
 - Name**: Choose a name for the project (e.g., **LMS**).
 - Description**: Optionally, add a description to provide more context about the project.
 - Visibility**: Choose whether you want the project to be **Private** (accessible only to those invited) or **Public** (accessible to anyone).
 - d. Once you've filled out the details, click **Create** to set up your first project.

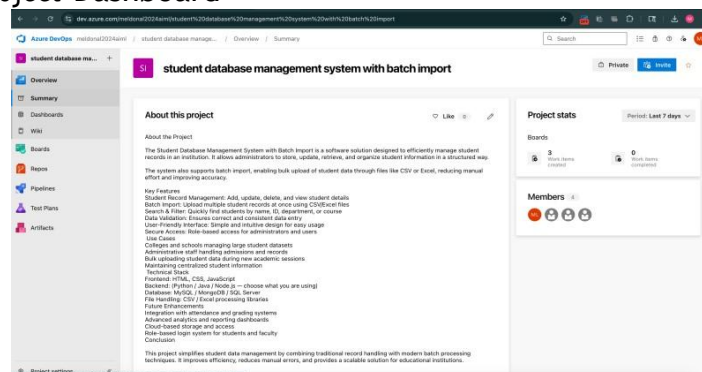

The screenshot shows the 'Create new project' dialog box in Azure DevOps. It has a title bar with a close button. The form contains the following fields and options:

- Project name ***: A text input field.
- Description**: A text input field.
- Visibility**: Two radio button options. The 'Public' option is selected. The 'Private' option is also visible. Below the radio buttons, there is a note: 'Public projects are disabled for your organization. You can turn on public visibility with [organization policies](#).'
- Advanced**: A section header with a caret icon.
- Version control**: A dropdown menu with 'Git' selected.
- Work item process**: A dropdown menu with 'Agile' selected.
- Buttons**: 'Cancel' and 'Create' buttons at the bottom right.

3. Once logged in, ensure you are in the correct organization. If you're part of multiple organizations, you can switch between them from the top left corner (next to your user profile). Click on the Organization name, and you should be taken to the Azure DevOps Organization Home page.

4. Project Dashboard

5. To manage user stories:
 - a. From the **left-hand navigation menu**, click on **Boards**. This will take you to the main **Boards** page, where you can manage work items, backlogs, and sprints.
 - b. On the **work items** page, you'll see the option to **Add a work item** at the top. Alternatively, you can find a **+** button or **Add New Work Item** depending on the view you're in. From the **Add a work item** dropdown, select **User Story**. This will

open a form to enter details for the new User Story.

The screenshot displays the Azure DevOps web interface for a project named 'Student Database Management System'. The 'Work items' section is active, showing a list of user stories. The interface includes a sidebar with navigation options like Overview, Boards, and Work items. The main area shows a table of work items with columns for ID, Title, Assigned To, State, Area Path, and Tags. The work items are sorted by 'Recently updated'.

ID	Title	Assigned To	State	Area Path	Tags
3	Student Profile Creation	Santhiya K	Active	Student Database Manageme...	
2	Student Information Management	Santhiya K	Active	Student Database Manageme...	
24	Student Data Search and View	Santhiya K	Active	Student Database Manageme...	
23	Student Data Access and Reporting	Santhiya K	Active	Student Database Manageme...	
28	Reports and Export	Santhiya K	Active	Student Database Manageme...	
19	Data Validation and Error Handling	Santhiya K	Active	Student Database Manageme...	
15	Batch Student Data Upload	Santhiya K	Active	Student Database Manageme...	
14	Batch Import and Data Upload	Santhiya K	Active	Student Database Manageme...	
22	As an admin, I want valid records to be saved automatically so that da	Santhiya K	Active	Student Database Manageme...	
27	As an admin, I want to view detailed student profiles so that complete	Santhiya K	Active	Student Database Manageme...	
13	As an admin, I want to view academic details of students so that repo	Santhiya K	Active	Student Database Manageme...	

RESULT:

Successfully created an azure DevOps project with user story management and Agile workflow setup.
